

15

said pressing member having an axis and said stabilizer leg portion outer ends being spaced further from said axis than said [presser] pressing member in every horizontal direction to limit tilt of the compressor assembly in every tilt direction.)

REMARKS

Applicant requests amendments of claims 8 and 13 to avoid indefinitenesses pointed out by the Examiner.

Applicant requests amendment of the specification to change "182" to -- 183 --, as has been done in the amended drawings. Applicant submits copies of Figs. 1 and 2 with requested changes shown in red ink. The changes avoid the insufficiencies pointed out in the last Office Action.

Entrance of the above amendments is courteously requested, to place the application in better condition for Appeal.

Respectfully submitted,

Leon D. Rosen
Attorney for Applicant
